

Cambridge Primary

Cambridge Primary, typically for learners aged 5 to 11 years, gives schools a world-class curriculum to develop learner skills and understanding in English, mathematics and science. It enables teachers to assess children's learning as they progress with two optional assessments: Cambridge Primary Progression Tests and Cambridge Primary Checkpoint.

Our curriculum frameworks for English also include an 'English as a second language' option.

Foundation for secondary education

Cambridge Primary helps identify a learner's strengths and weaknesses and can be used to support learning and development. It prepares learners for a smooth transition to Cambridge Lower Secondary and beyond.

External benchmark

Cambridge Primary assessments, including Cambridge Primary Checkpoint, provide teachers with an international benchmark to inform their teaching and easily measure learners' progress over time. They also enable detailed, structured reporting to parents.

International curriculum

Appropriate and relevant internationally, Cambridge Primary has been designed to be culturally sensitive. It includes top-quality teaching and assessment resources appropriate for teaching and learning in local and international schools.

Flexibility

Cambridge Primary complements a range of teaching methods and curricula. No part of the programme is compulsory and schools have freedom to choose the parts that best suit their situation. This means they can use Cambridge Primary while following their school or national curriculum, or offer the entire programme.

Comprehensive support for teachers

Support includes face-to-face and online training, curriculum frameworks, teacher guides, lists of resources and a secure support site.

Information and communications technology

Schools can use [Cambridge ICT Starters](#) within Cambridge Primary to introduce young learners to the key ICT applications they need to achieve computer literacy. It gives schools a flexible framework to develop ICT skills.
