

WP 2.4 THE SAFETY OF NOVEL PRE- AND POSTHARVEST PROCEDURES

Leader	DFVF (Danish Institute for Food and Veterinary Research)-Denmark. Mette Poulsen
Other participants	ACW (Agroscope Changins-Wädenswil Research Station ACW)-Switzerland; UNIBO (Alma Mater Studiorum Università di Bologna)-Italy.
OBJECTIVES	
The Objective is to document the safety of new and existing sustainable fruit production methods during pre- and post harvest	
TASKS	
Task 2.4.1. Efficacy of new post-harvest rot treatments	
Task 2.4.2. Critical steps for chemical contaminants in the chain from harvest to consumer	
Task 2.4.3. Comparison trial with new spraying techniques	
Task 2.4.4. The effect of production systems on mycotoxin contamination
