CmapTools is used worldwide in all domains of knowledge and by users of all ages to graphically express their understanding. In particular, CmapTools is used in schools, universities, government organizations, corporations, small companies, and other organizations, both individually and in groups, for education, training, knowledge management, brainstorming, organizing information, among other applications. The collaboration and publishing features provide a powerful means for representing and sharing knowledge.

The **IHMC CmapTools** client is **FREE** for use by anybody, whether its use is commercial or non-commercial. In particular, schools and universities are encouraged to download it and install it in as many computers as desired, and students and teachers may make copies of it and install it at home.

Please fill out the following information to download **IHMC CmapTools**.
